EXECUTIVE SUMMARY

EM Capital is excited to announce the intent to acquire Churchill at St. Andrews, located in Columbia MSA* South Carolina.

Churchill at St. Andrews, a 132 Unit C Class Property, was built in 1972 and is in wonderful condition. This property features large townhomes and garden style apartments and is only 8 miles from Downtown Columbia. Located in the second largest market in South Carolina, Churchill at St. Andrews is in the Lake Murray submarket, one of the most desirable areas in the Columbia MSA. This submarket continues to experience an influx of new residents, driven by the top-rated school district and proximity to well-known established employers.

Columbia is nationally ranked among the top five cities for highway connectivity with an interstate network that includes I-20, I-26, I-77 and I- 95, offering easy North to South and East to West access.

Columbia Metropolitan Airport (CAE) is the southeast Regional Air Hub for UPS, covering nine states. The Port of Charleston, the eighth largest shipping terminal in the US, is located less than two hours away. Local rail services include CSX Transportation, Norfolk Southern and Amtrak.

PROPERTY BENEFITS

COMPETITIVE LOCATION

Located less than 15 minutes from Downtown Columbia, Churchill at St. Andrew gives residents the luxury of city living with the comfort and quietness of the suburbs, but **the real gem is the local school district.**

Located in the Lexington Five School District and ranked #1 in the state, residents of Churchill at St. Andrews get access to top-tier education, one of the many benefits of the property.

Throughout the 2020 fiscal year, Churchill at St. Andrews has **maintained a 92% occupancy rate**, illustrating the strength of the property despite the effects of COVID-19.

WITH LOTS OF ROOM FOR VALUE-ADD

Though Churchill was built in the 1970s, there is great room for growth, renovation and more. Currently, a small number of units have been renovated, yet they are already leased for target **rent rates**, proving an exciting opportunity for value-add.

FAVORABLE SUPPLY/DEMAND DYNAMICS

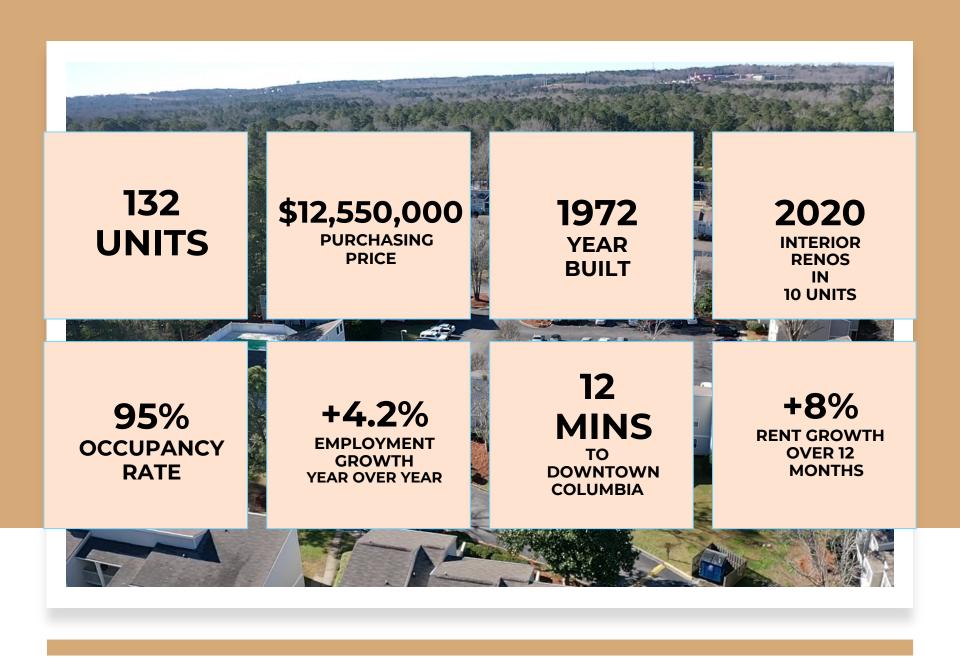

Columbia's multifamily development has one of the lowest rates of aggregate growth among nearby competitive markets. Of all new multifamily development in the pipeline, 40% is student housing and not competition for traditional suburban multifamily product, a huge bonus for investors.

AMENITIES

Churchill At St. Andrews is an exciting property, mainly because the possibilities are endless. With minimal renovations, and great room for value-add, current and prospective residents can expect to experience an upgrade like no other.

The property features garden style apartments and spacious townhomes with washer and dryer connection in all units. The most hidden amenity is the location as Churchill is districted in one of the best school systems in the state.

REAL ESTATE TERMS

CAPITALIZATION RATE— a rate of return on a real estate investment property based on the expected income that the property will generate. Capitalization rate is used to estimate the investors potential return on his or her investment. This is done by dividing the income the property will generate (after fixed costs and variable costs) by the total value of the property. When acquiring income property, the higher the capitalization rate (cap rate) the better one selling income property, the lower the cap rate the better. A higher cap rate implies a lower price, a lower cap rate implies a higher price.

CASH FLOW - cash generated from the operations of a company, generally defined as revenues less all operating expenses.

CASH-ON-CASH- a rate of return often used in real estate transactions. The calculation determines the cash income on the cash invested. Calculated: annual dollar income return/total equity invested = cash-on-cash

DEBT SERVICE COVERAGE RATIO (DSCR) - it is the multiples of cash flow available to meet annual interest and principal payments on debt. This ratio should ideally be over one that would mean the property is generating enough income to pay its debt obligations.

Return on Equity (ROE) - the amount of net income returned as a percentage of shareholders equity

INVESTOR AVERAGE ANNUAL RETURN, EXCLUDING DISPOSITION -the average return per year during the investment hold.

INVESTOR AVERAGE ANNUAL RETURN, INCLUDING DISPOSITION - the average return per year including profits from disposition. This calculation does not include the return of investment capital.

INTERNAL RATE OF RETURN (IRR) - the rate of return that would make the present value a future cash flow's plus the final market value of an investment opportunity equal the current market price of the investment or opportunity. The higher projects internal rate of return, the more desirable it is to undertake the project.

RETURN ON EQUITY (ROE) - the amount of net income returned as a percentage of shareholders equity. ROE is expressed as a percentage and calculated as: return on equity = net income/ shareholder's equity.
